

Testing audio plugins and UIs with Carla

(using version \geq 2.0-beta4)

KXStudio

What is Carla?

- Modular Plugin Host
 - LADSPA, DSSI, LV2 and VST2
- Separate small CLI tools
 - Used for discovery and plugin bridging

carla-discovery

- CLI Tool used to scan plugins
 - Prints any useful info to the terminal
- Can do small tests
 - Load/Unload plugin several times
 - Single pass of audio and MIDI events

carla-bridges

- Load single plugin as JACK client
 - Easy testing of DSP + UI
- Load UIs separately from DSP
 - Easy testing without having to handle audio

See more of Carla at the
workshop tomorrow!
